

Peter Wong has a strong background in both the technical and design aspect of architecture. Coupled with his proficiency in communication and coordination, his projects are always smooth running, from schematic design to completion of construction. He excels in his ability to build a client's wish-list into an interesting and creative design, and takes that design on to the reality of a built form.

One of Peter's strengths is his facility for planning and programming. He has recently been involved in several projects for the Eastlake Industrial park that are designed on LEED™ principles. Peter is also currently providing design services for Shepard Regional Centre Phases 2 and 3, which includes both large and small retail spaces, banks, restaurants and industrial and office areas. Beginning with the formulation of Architectural Guidelines, Peter has developed a unique flavour for the development.

EDUCATION

Bachelor of Environmental Studies, University of Manitoba, 1982
Master of Architecture, University of Manitoba, 1985

MEMBERSHIPS

Alberta Association of Architects
Royal Architectural Institute of Canada
